Widgets/video pop-up

Creating a video pop-up
Updated 01.01 2022

Editor

- Paths to access to editor:
- Home page
- "Project library"
- Project settings

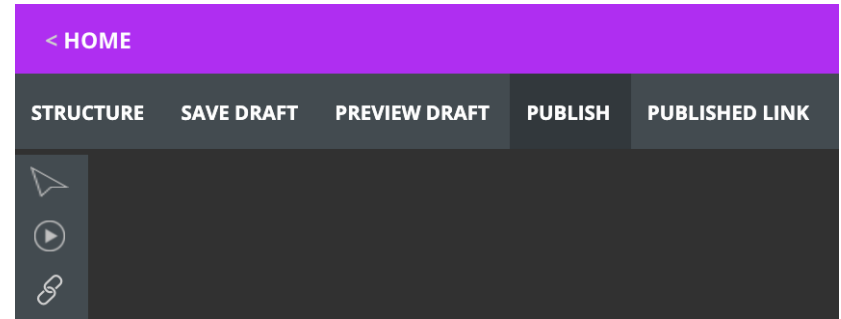

Saving and publishing

- "Save draft" saves changes, but publication is not yet public
- "Preview draft" allows you to see the changes
- "Publish" publishes all editing also on-line
- "Published link" opens the the actual online url

NOTE!

- Remember to "save draft" each time before leaving the page!

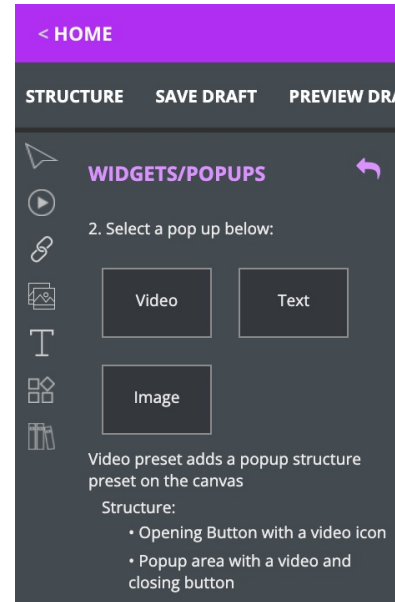

Select video pop-up widget

- Top left tools include "Widgets"
- Select "Popup"

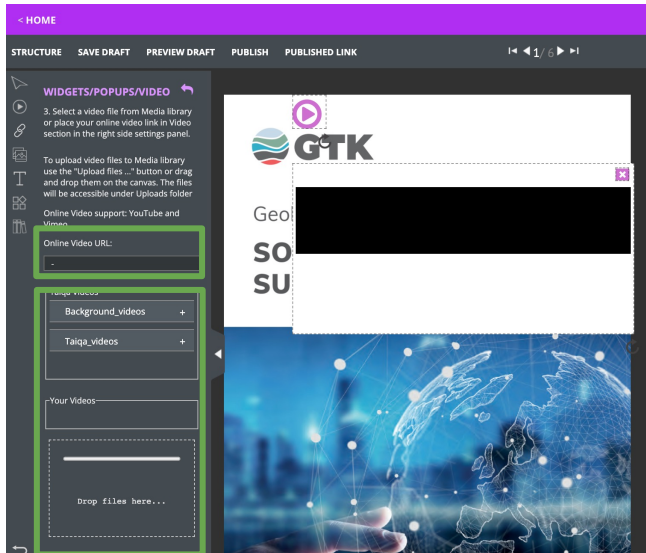

- Select "Video"

Create video pop-up

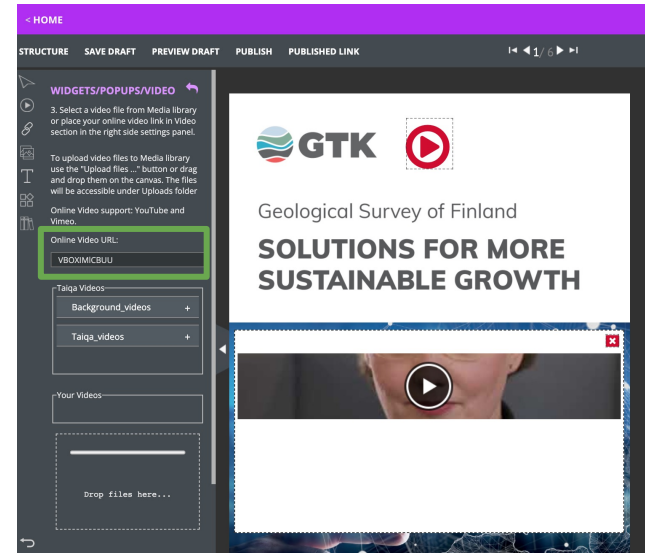

- Control icons and video screen open on canvas
- Copy/paste online video url or select the video file from media library

NOTE!

Remember to "save draft" each time, before leaving the page!

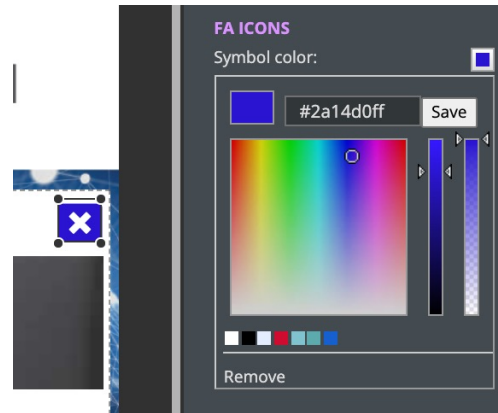

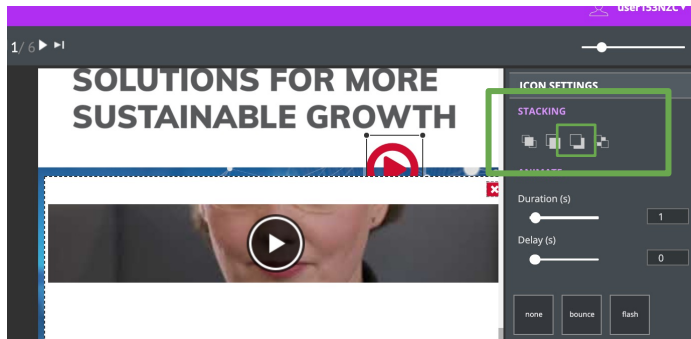

- Adding the source will visually open the video
- Place and position the elements on the canvas

Create video pop-up

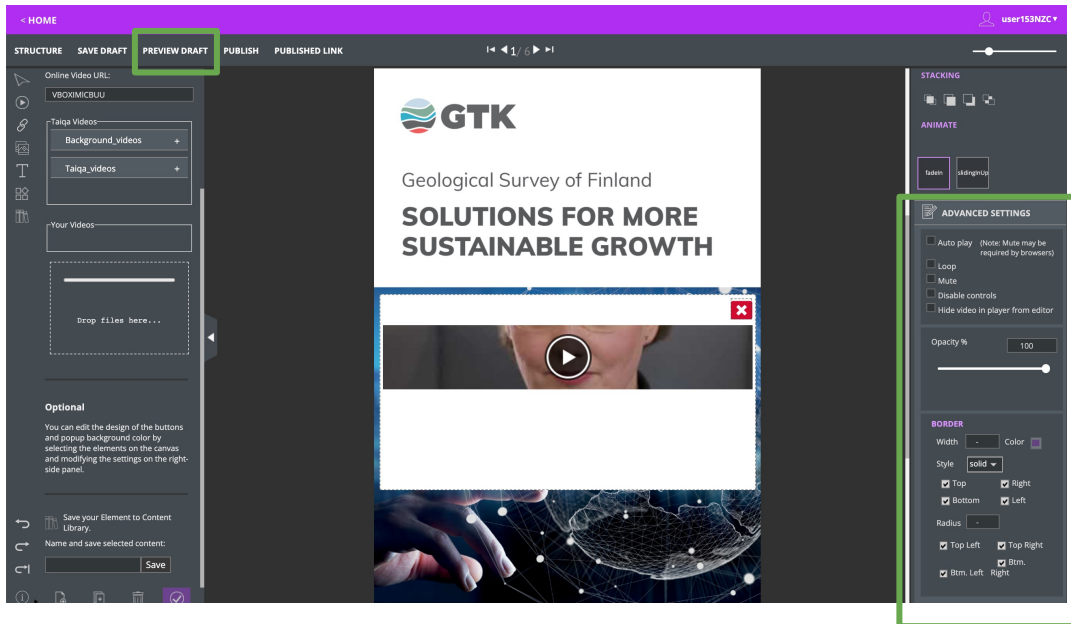

- Preferred play button placement might be under the video screen
- Stack the button correctly

- Clicking the symbol will also allow you to change the color or example animate the play button entrance on the page

Creating video pop-up

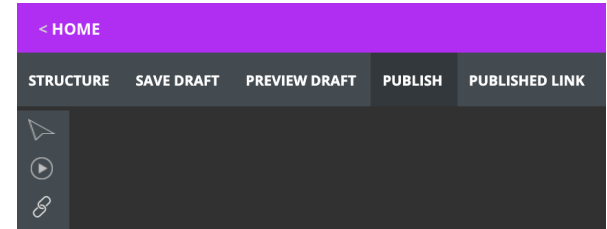

- You are now ready to "Preview draft"

- Clicking the video screen will open settings and you can modify some video features; does the video start automatically, is it on mute, etc

Viewing video pop-up

- Opening "preview draft" or "published link" will open the page where pop-up is located
- Only play button is visible
- Pressing play button will open the video and close (x) is available
