

# Taiqa Publisher Pro Editor

Creating external links manually  
Updated 01.01 2022

# Topics

## 1. Link type

- 1.1 Icon
- 1.2 Image
- 1.3 Area

## 3. Saving and publishing

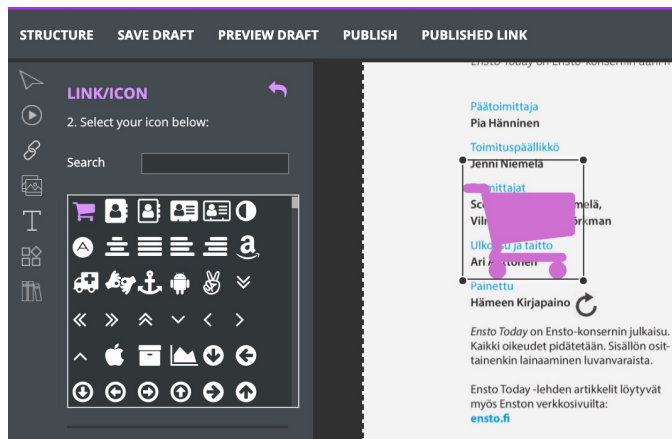

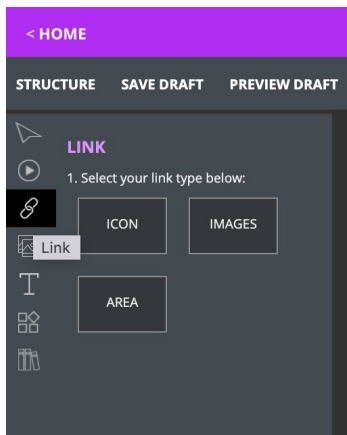

- Draft
- Published link

## 2. Link settings

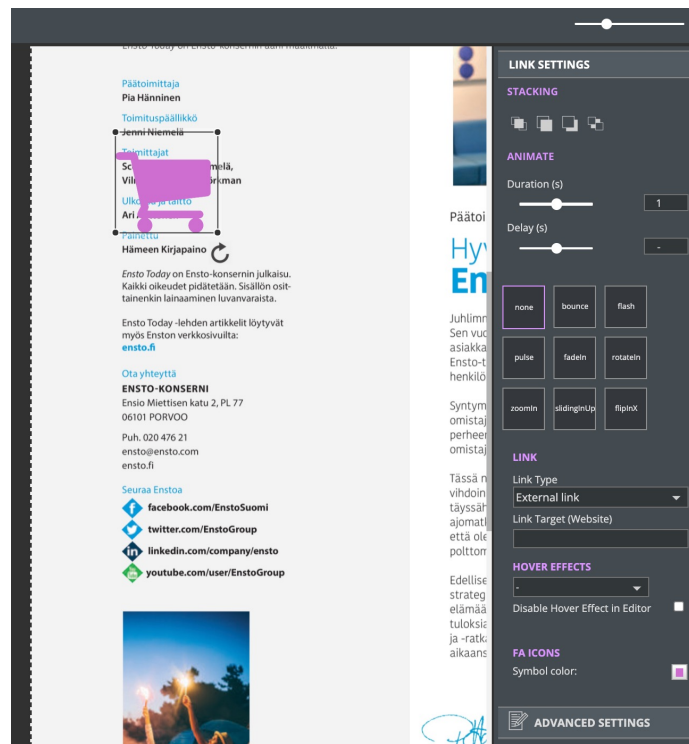

- 2.1 Link type
- 2.2 Hover & color
- 2.3 Animate & stacking
- 2.4 Advanced settings

# 1.1) Link type; icon

- Editor tool menu on the top left contains the link (chain) symbol
- Select the type of link you like to create; icon, image or an area
- Selecting "icon" will open icon selector and place icon to the canvas

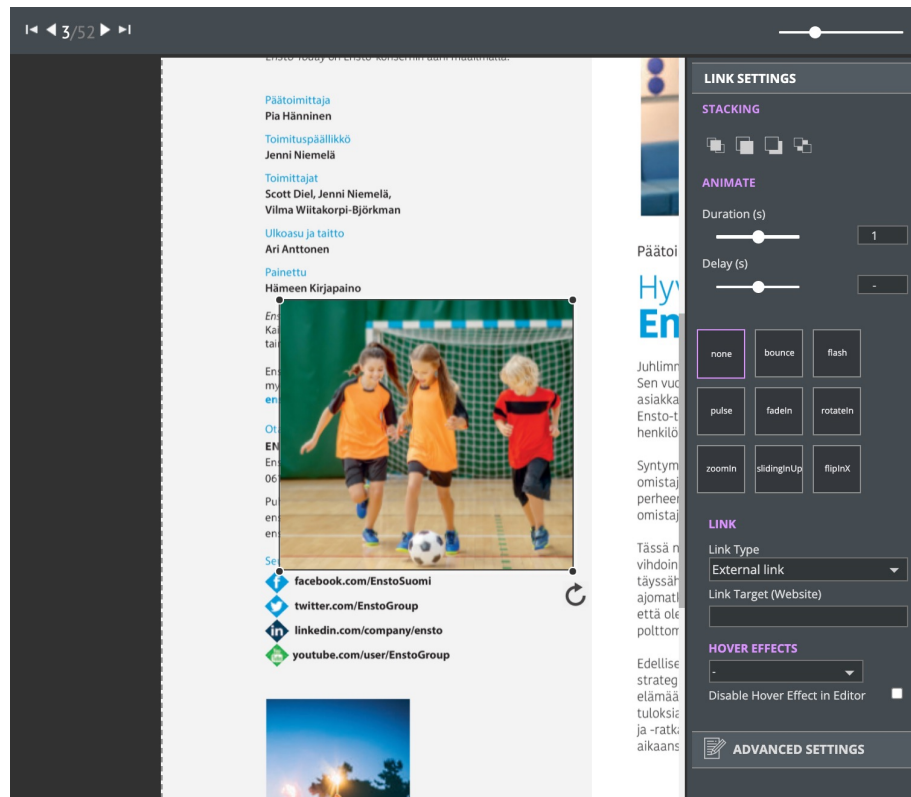

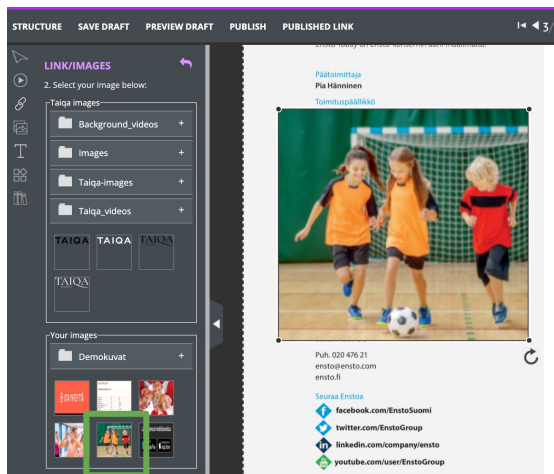

- Clicking the icon will also open the "Link settings" to the right side

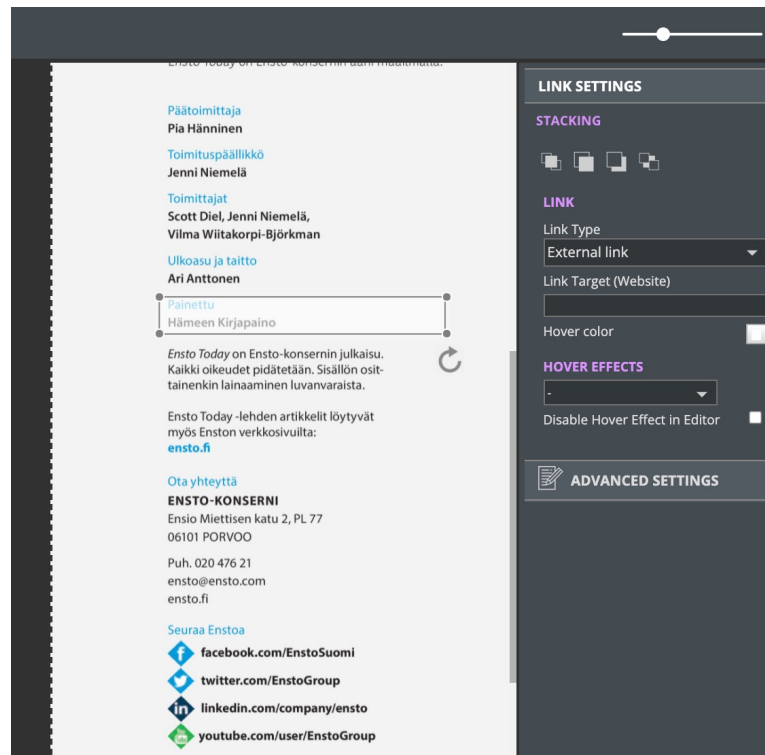

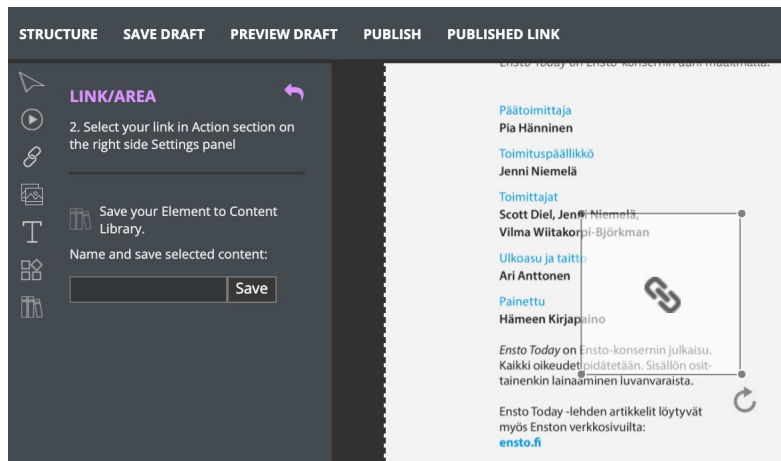

## 1.2) Link type; image

- Selecting "images" will open images selector
- Choose an image to the canvas
- Selecting the image will also open the "Link settings" to the right side
- Image can be modified by size and shape
- Dragging will allow you to freely move it

## 1.3) Link type; area

- Selecting "area" will open a link to the canvas
- "Link settings" will open to the right side
- Area can be modified by size and shape
- Dragging will allow you to freely move it

## 2.1) Link settings

- Settings are similar for icon, image and area

- Link Type

- Main types are:

- External (url-link)
- E-mail
- Phone number

- Fill in the desired url

LINK

Link Type  
External link

Link Target (Website)

[Empty text input field]

- Fill in the email address

To page: 1

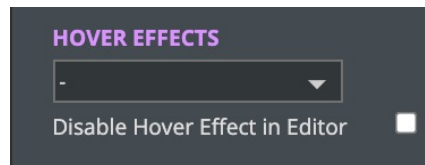

To page: 2

To page: 3

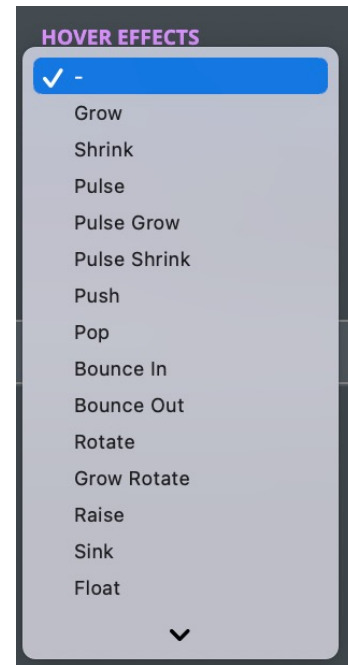

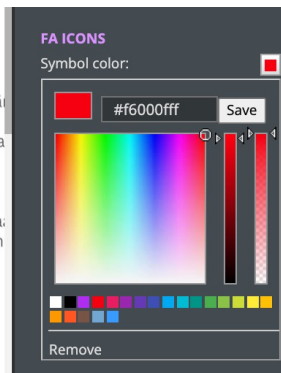

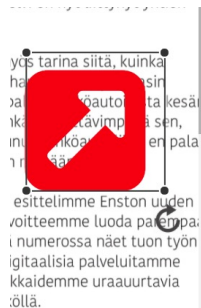

To page: 4

## 2.2) Link settings

- Hover effect
- Select the effect. Effect activates when mouse is moved on top of the link
- Hover does not work on mobile devices
- Symbol color
- Change the symbol color
- Also possible by hexa code

- Disabling effect in editor is useful if page contains volumes of hover effects. Editing becomes visually more pleasing

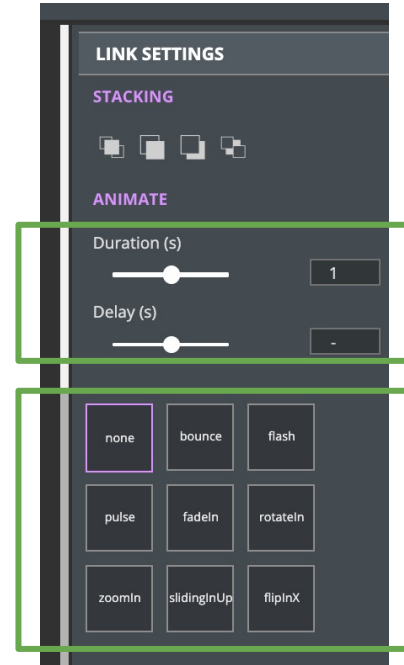

## 2.3) Link settings

- Animation

- Animation of the links, especially icons, is helpful in highlighting the link action
- Type of animation
- Timing of the animation effect

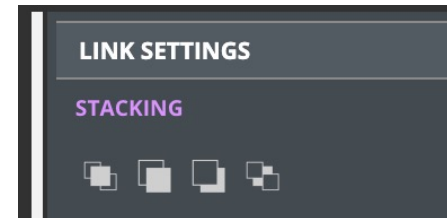

- Type of animation

- Timing of the animation

- Stacking

- If several links are on top of each other, here you can set their order

## 2.4) Link settings

- Advanced settings
- When using either area or image link, you can also set:
  - Opacity of the chosen color
  - Have borders around the link and modify it

The image shows a dark-themed settings panel titled 'ADVANCED SETTINGS' with a notepad icon. It contains two sections highlighted with green borders. The first section, 'Opacity %', features a slider set to 60. The second section, 'BORDER', includes fields for 'Width' (set to '-') and 'Color' (a purple swatch), a 'Style' dropdown set to 'solid', and checkboxes for 'Top', 'Right', 'Bottom', 'Left', 'Top Left', 'Top Right', 'Btm.', 'Btm. Left', and 'Right'. The 'Radius' field is also set to '-'.

**ADVANCED SETTINGS**

Opacity % 60

**BORDER**

Width - Color

Style solid ▾

☒ Top ☒ Right

☒ Bottom ☒ Left

Radius -

☒ Top Left ☒ Top Right

☒ Btm. Left ☒ Btm. Right

### 3) Saving and publishing

- **"Save draft"** saves changes but publication is not yet public
  - "Preview draft" allows you to see the changes
- **"Publish"** publishes all editing also on-line
  - "Published link" opens the the actual online url

#### NOTE!

- You must save changes made, before leaving the page!
